James Thonsgaard

Music Makes The Event!

Music is a very important part of your celebration and helps your guests to make their own good time. The right choice will enable you to sit back and relax knowing all of your guests are having the time of their lives. Music Machine can provide subtle background music during dinner, then turn up the volume to dance the night away. I offer a variety of music to match your tastes. And because you work directly with the Disc Jockey that will be at your event, you can be confident that everything will go smoothly and as planned.

Experience

I have been working as a Disc Jockey for over ten years, the last eight years as a Mobile Disc Jockey. I have performed at all kinds of events from Weddings, Birthday Parties, Reunions, Proms, Christmas Parties, almost everything! The events have taken place everywhere from paddle boats to garages to grand hotel ballrooms. Select me for your event and you will be getting a very experienced Disc Jockey that is confident and knowledgeable. And if you would like a list of references, I will be happy to give you one.

Professionalism

Along with many years of experience, I have a commitment to quality and professionalism. I am a member of GHAMMA, the Greater Houston Area Mobile Music Association. Only those that meet very strict requirements are allowed to join. Some of those requirements include the type of equipment used and references from past events. I use only professional equipment, including BGW amplifiers and Cerwin Vega speakers. Even professional equipment can fail, so I carry with me at all times a backup amplifier, compact disc player, and speakers. My music library consists entirely of compact discs, and spans the decades from the 1920's to the very latest hits. Select me and you know that your Disc Jockey will have the music that you want and will be ready to perform on time. Choose someone you can trust, choose James Thonsgaard.

Preplanning

You will receive a written contract that includes the details of who, where, and when the event is to take place. You will also receive a Wedding Reception Planner that covers all aspects of your event. It helps you to decide the order of events and the types of music that you want. Your musical selections tell me what to expect, and serve as a guideline when taking requests from your guests. The Wedding Reception Planner allows each of us to know what is going to happen and when. Select me and I will make sure that your desires are listened to and satisfied.

Flexibility

Preplanning doesn't mean set in stone. If you think it would be better to change things around, go ahead, it's your party and I'm flexible! The real skill behind being a good Disc Jockey is to make sure that the Bride and Groom are kept at the center of attention. The Disc Jockey is not the show! The wedding package including the church, entertainment, food, photographer, and everything else have all been put together by the Bride and Groom, with the help of family and friends. And it is the job of the Disc Jockey to present that package in the most gracious manner possible.

This is a typical setup for a wedding or small party. This photo was taken at the Junior League Tea Room, Garden Room.
